

Vincenzo Sorrentino obtained his medical degree as summa cum laude in 1980 from the Faculty of Medicine in the University of Rome. From 1983 to 1987 he did postdoctoral studies at the Laboratory of Cellular and Molecular Biology, National Cancer Institute, NIH, Bethesda and at the Frederick Cancer Research Institute, Frederick, Maryland. Shortly afterwards he worked at the Laboratory of Viral Oncology, at the Memorial Sloan-Kettering Cancer Center, New York. In 1988 he joined the European Molecular Biology Laboratory in Heidelberg, Germany as a full-time scientist. In 2000 he was employed on tenure as a Professor of Histology in the School of Medicine at the University of Siena. Since 2012 he has been working as the Head of the Molecular Medicine Section, Department of Molecular and Developmental Medicine.

His research interests include the molecular and cellular biology of muscle cells, the biology of stem cells and the diagnosis and pathomechanism of human genetic diseases. He has 179 publications with a total Impact Factor of 813, 6810 citations, and a Hirsch index of 47. His close partnership with the University of Debrecen dates back to more than 2 decades. He participated in the international program between 1996 and 2006, which was founded for two consecutive periods by the European Union Framework Program. Besides the scientific cooperation, the Department of Molecular and Developmental Medicine at the University of Siena and the Department of Physiology at the University of Debrecen also join forces in educational matters.
